## **DETAILED ACTION**

The Amendment filed on July 12, 2007 has been acknowledged.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7, 8, 19, and 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The computer program's or instruction code's functionality cannot be realized without a computer-readable medium. Thus, the computer program is treated as nonstatutory functional descriptive material (MPEP 2106(I)).

### ***Allowable Subject Matter***

Claims 5, 6, 14-16, 22, 27, 30-33, 45, and 46 are allowed.

### ***Reasons For Allowance***

Art Unit: 2863

The method or combination as claimed wherein removing the first service module from the printer and installing the second service module in the printer in place of the first service module (claim 5, 22, 30, 31, 45) or said printhead-related service condition includes ink on a printhead carriage interconnect, and the second service module includes a brush arranged to clean the interconnect (claims 14, 27) or the second service module includes a special capping structure having a range of movement along an axis generally transverse to a nozzle array of the printhead (claims 15, 32) is not disclosed, suggested, or made obvious by the prior art of record.

### ***Response to Arguments***

Applicant's arguments filed on July 12, 2007 have been fully considered but they are not persuasive.

With respect to the 35 USC 101 rejections, Applicants argue that a prima facie case has not been established and the subject matter is clearly statutory.

Examiner's position is that, according to MPEP 2106(I), "computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's

Art Unit: 2863

functionality to be realized. In contrast, **a claimed computer-readable medium encoded with a computer program** is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See Lowry, 32 F.3d at 1583-84, 32 USPQ2d at 1035."

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
